Dear Sir/Madam

My name is Anahita and I am an engineer (MSc) in automation & instrumentation and have more than 14 years experiences in oil and gas field. I find development very motivating. Hence I have enthusiastic to work in an international company where previous skills and capabilities can be put to efficient use.

I am a highly self-motivated, flexible and proactive person with ability to work in the interdisciplinary team, I also work well in a team and I am willing to take responsibilities. To finish tasks in a defined deadline is a priority for me and I am result oriented and organized person especially at work.

As a senior engineer with more than 4 years experiences in leading engineering team, I have developed strong skills in leading, communication and problem solving. For example, as a youngest lead engineer in the C&I department of Nargan including 70 employees, I am responsible for a one of the company's significant project and deal with a lot of technical challenges with client, vendors and other engineering Departments in order to get progress in preparing deliverables.

Likewise, my English skill is in advanced level. I am also eager to improve my German language and confident that I can reach level B2 in German in one year.

To a Job interview with you I am very happy. A job seeker visa of Germany up to 18.May.2019 is available. My work permit is also under process.

Sincerely
A.Mohammadi
